INTERESTS

ABOUT ME

Industrial Engineer from the University of Vigo, passionate about new technologies.

I started my professional activity in the automotive sector through the PSA Group and VMS (StartUp) where I was developing a 100% electric vehicle. Now I am in the world of web development after a bootcamp at Ironhack.

Self-taught, team player, flexible, always looking for new challenges and with the ability to pivot quickly but always with the same philosophy, never stop learning.

EXPERIENCE
